

Welcome to our 2010 vegetable seed catalogue

Dear Gardener,

As finances are getting tight at the moment with increased fuel costs etc, we have increased our £1.00 range as we believe that organic seeds should be the same price as conventional seeds, we have also reduced our p&p to Only £1.00* for seed orders We where pleased to be awarded large gold medal for our display of organic vegetables at this years royal Berkshire show pics are available to view on line

We have also introduced some conventional seed varieties due to requests from customers we have only done this where organic alternatives are not available. We have also introduced some onion sets and shallots to our mail order range as well as our Separate new potato catalogue

Wishing you all a good growing season in 2010

David Williams

All our seeds are 100 % organic seeds and are produced on certified farms. No pesticides, herbicides or chemical fertilizers are used in the growing of the seed crop so all our seeds are of the highest quality
